OUTDOOR // When the weather warms up, we'll take any possible excuse to be outside. The Ulaelu Outdoor Kitchen makes it simple to indulge your penchant for sunshine by providing the tools to prepare meals outside. The sink attaches to your garden hose, while a natural stone worktop and charcoal grill give you all the kitchen accoutrements you need to whip up a feast outdoors.

STONE // Not interested in being pushed aside as merely an emergency light source, the Weight Here family of candelabras by KIBSI offers a modern take on the shapes of historical candlesticks and candelabras. The collection features cast-iron and Polystone materials coupled with sleek design, ensuring it will be given pride of place on the mantle, rather than simply pulled out when modern electricity fails.

CHARM // A piece of well-made marine rope not only lasts a long time, but it also looks better with age. Knowing this, the minds behind Found My Animal began crafting dog leashes from three-strand, hand-spliced marine rope. The duo met while each walking their rescue dogs – both happened to be named Walter – in Brooklyn, and now use their brand to promote and support the adoption of other rescue dogs.
