vase Shelves

Design Bakery Studio (www.bakery-design.com)
 Function Shelf
 Size 1,400x350x720~1,420mm
 Material Beech Board, Polyurethane Coating
 Photographs Offered by Bakery Studio

디자인 베이커리 스튜디오
 기 울 선반
 크 기 1,400x350x720~1,420mm
 재 료 너도밤나무 판, 폴리우레탄 코팅
 사 진 베이커리 스튜디오 제공

The Vase Shelves project is a modular shelving system that is constructed of beech wood planes and vase shaped lathed wood elements that serve as connectors between one plane to another and give the object its unique look and constructional qualities.

The project drifts between the worlds of function and non function, engineering and decoration, art and design. From the one hand the shelves are seemingly performing their function even when no objects are placed on them, because the vase shapes create the illusion of objects that are already placed on the shelves, and so it is a shelf-sculpture that is beautiful by its own being. But on the other hand the shelves remains a practical shelving unit ready for use.

The user can play and customize the amount of shelf-sculpture he would like the object to have by adding or removing vases and so determine and determine the objects functional level.

이 오브제는 너도밤나무 판 사이를 꽃병 모양의 목재로 연결시켜 마치 선반 위에 꽃병이 놓여 있는 듯 구조미를 부각시키고 있다. 개인에 취향에 따라 선반을 더하거나 뺄 수 있어 실용성이 돋보이며 또한, 물체가 놓여 있지 않을 때는 아름다운 조각품으로도 활용이 가능하다.

기능성과 비기능성, 공학과 장식, 예술과 디자인의 경계를 넘나드는 꽃병 선반은 디자이너의 재치 넘치는 발상이 돋보이는 작품이라 할 수 있다.
